

CLAIM OR CLAIMS

[0001] What is claimed as the invention is the creation of a portable, brained (computer), body motioned machinery embedded with the following elements, or combination thereof:

- shape/multifunctional transformation;**
- spectrometry;**
- chromatography;**
- energy-induced scan;**
- data transmission;**
- high voltage, low amperage electrical charge;**
- directed energy beam.**

[0002] What is claimed as the invention is a system or method of integrating the following components within a single, detection unit:

- sliced, rotational energy-induced inspection with;**
- the measurement of masses and relative concentrations of atoms and molecules.**

[0003] What is claimed as the invention is a system or method of integrating the following components within transportation vehicles:

- surveillance;**
- material discrimination;**
- data transmission;**
- polycarbonate, fire resistant compound.**

[0004] What is claimed as the invention is the creation of cameras (Spider Cams), comprised of the following:

- multiple, attached lenses;**
- rotational mount;**
- expanding/contracting extensions ('legs');**

extending/curtailing extensions ('legs');
manual or automatic modes of operation.
